### REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance: None of the prior art of record, singly or combined, teach an iridescent pigment comprising a platelet substrate and a coating wherein the coating contains at least one repeating set of metal oxides layers of tin and titanium.

4. Patent 5,753,371 teaches a layer unit of tin oxide and titanium oxide but fails to teach a repeating set of such layer unit. As shown in the specification, iridescent pigments that do not comprise at least a repeating set of tin oxide and titanium oxide, the brilliance of such pigments is inferior as compared to that of pigments that contain a repeating oxide layers of Sn and Ti. In examples 1 and 3 of the specification where the iridescent pigments contain only one set of tin oxide and titanium oxide, the value of brilliance (Y) is under 9. On the other hand, in examples 2, 4 and 6 where there is at least a repeating set of metal oxide layers of Sn and Ti, the brilliance (Y) value is at least 9.1.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
